

Manufacturer Declaration of Conformity for PFAS (Per- and polyfluoroalkyl substances)

Per- and polyfluorinated alkyl substances (PFAS) are a group of extremely persistent chemicals that are used in many consumer products as they increase oil and water repellency and are able to withstand high temperature environments.

This is to confirm that COTSWORKS does not directly purchase any PFAS for the product(s) listed in the table below and that the product(s) does/do not contain any PFAS.

COTSWORKS' Transceiver Families	Product Name
RCP	Rugged Chip Scale Pluggable Transceiver
RJ	RJ Module Jack
SFF/B	Small Form Factor and Bi-Di
QSFP/SFP+	Rugged Pluggable Transceivers

For our fiber cable and cable assemblies, PFAS may be present in the jacketing and buffer systems of these products (see Table below). COTSWORKS has processes and procedures in place to be sure that our products meet our customers' specifications and requirements, while also complying with all relevant rules and regulations for persistent chemicals.

COTSWORKS' Fiber Products	Product Name
SPLX	Simplex Cable Assemblies
CPLX	Complex Cable Assemblies
HD	High Density Cabling
MT	Mechanical Transfer Cable Assemblies
FIBER	Fiber Type & Jacketing

If you have any questions, please feel free to contact us directly at quality@cotsworks.com.

Sincerely,

Kenneth Kingston, Director, QMS
